

Manley Deas Kochalski, LLC

LITIGATION

Manley Deas Kochalski LLC is a litigation firm that focuses on creditors' rights. Our attorneys are experienced litigators who have the character, intellect, and experience to represent clients whose legal needs include high-volume matters and complex civil litigation.

We practice law with the objective of solving business needs. We are a leader in using technology to ensure high-quality, cost effective services. We use alternative billing to make costs predictable. Through our affiliated title, management and software engineering companies, we offer services that extend beyond the traditional practice of law. For these reasons, MDK is the right choice for clients who prefer a single firm for all of their litigation needs in the credit and default areas.

We also practice law with the objective of being a positive member of our community. We work closely with government and community leaders on legislative issues. Closer to home, we have been recognized as a leader for our bike-to-work initiative, support of local artists, and commitment to hiring from the deaf community. These and similar initiatives are key parts of our progressive culture.
